

### **Ahmed - Quirky treasure**

I grew up on Enid Blyton books! I read all of them, and my impression of England was completely different to the reality. I thought there would be generous ladies in the farmhouses giving out lashings of cream and strawberries to people! I was surprised at how grimy Britain was. But on the plus side, it's very well ordered. Cars are driven in a sensible way. And it's not as crowded as Kenya had been. There were lots of positives, but there were things that were a big shock to the system. It was the first time we saw dustmen who were white. It was such a shock, people's jaws dropped. These people who ruled our country are now taking our dustbins. It was something we couldn't get our heads around. It led us to appreciate things.
