

### **Samit - Barriers and challenges**

My in-laws are very happy mixing only in the Asian community. They do not have any English friends. For our generation, our second generation, it is a lot easier because we go out to work and we meet people, we have other interests. My wife and I thoroughly enjoy going to the theatre. We are supporter members at the Curve, and we have been for the last 10 years. We go to probably a dozen or so shows a year at the Curve and then we go to De Montfort Hall as well. We go to the theatre in London as well. Now if I look at my friendship circle, there are very few who enjoy going to the theatre.
